Google - Software Engineer III (L4)	Nov
 Focus: Generative Al APIs. Designed and implemented core server handlers powering the PaLM API. 	
 Owned and maintained tokenization endpoints for 10+ generative models. 	
Google - Software Engineer II (L3)	202
 Focus: Natural-language understanding for Discover. Built and launched multimodal content classifiers spanning 100+ languages. Wrote and deployed self-supervised pipelines that predict user behavior. 	
Google - Software Engineering Intern	2020
 Focus: Recommender systems for Discover. Designed and wrote a custom attention layer; ranking accuracy soared. Found and fixed a critical bug in a production deep learning library.
